

DEHNCO
WORK
BETTER

INNOVATIVE SOLUTIONS AND EXPERTISE
EFFICIENCY • ADAPTABILITY • PRODUCTIVITY • WORKFLOW OPTIMIZATION

OUR STORY

As a company, our mission is to “Work Better.” And when we say that, it’s more than just a turn of phrase or a corporate rallying cry. We mean it literally.

Our mission statement comes directly from what we do at Dehnco. Since 1976, we’ve been manufacturing and supplying custom-fit, ergonomic equipment solutions that feel better, flow better, and just plain work better. From the very beginning, our business has been about bridging bottlenecks and solving for inefficiencies—all while protecting and centering workers. And in an industry that’s becoming increasingly complex and evolving at a lightning pace, we pride ourselves on our ability to innovate and adapt with

strong, safe, and scalable fulfillment solutions.

Dehnco was founded in 1976 by Al Dehnert, a leader of warehouse and workstation innovation. Dehnco is proud to still be family owned and operated, working under the same, guiding principles of worker safety, integrity, and comfort.

As a company, we design all of our equipment for comfortable, reliable, long-term use, and we’re proud to back those claims with a lifetime guarantee. We’ll work with you, as partners, to provide equipment solutions to empower your operation and solve whatever challenge comes your way.

FOR EVERY TYPE OF WORK

Whether you're looking for solutions for receiving, packing, shipping, prepping, or assembling, we have the equipment and the expertise to help you get the job done.

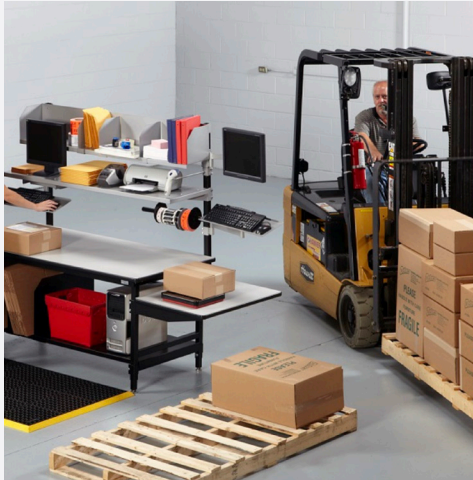

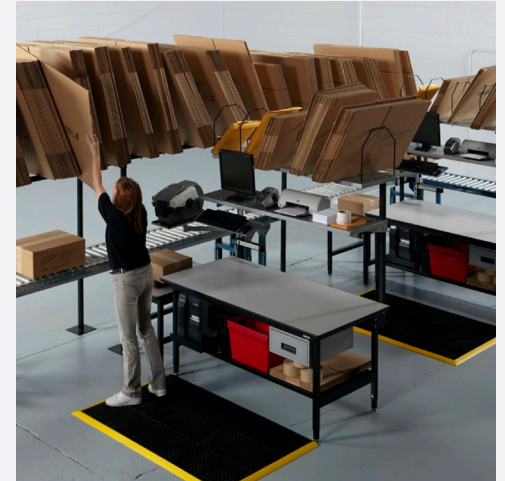

< Packing and Shipping

Improve productivity and boost efficiency with ergonomically-designed packing and shipping equipment solutions

Over Conveyor Workstations & Storage >

Maximize valuable floor and storage space with over-conveyor workstations and storage systems. Our vertical, modular solutions will help you make the most of every square foot.

< Returns Processing & Reverse Logistics

Master the reverse supply chain with thoughtfully designed receiving and returns processing work areas.

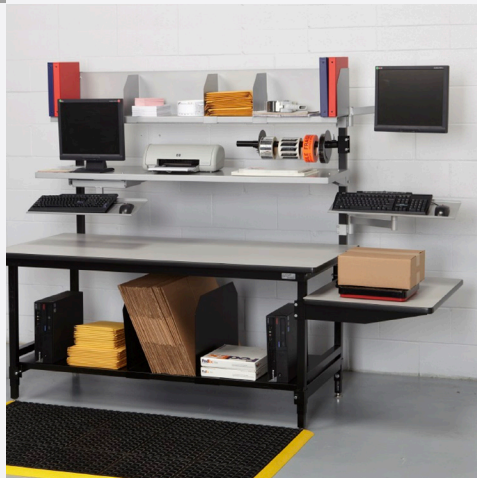

< Ship From Store and Omnichannel Processing

Maximize efficiency and improve supply chain flexibility with ship-from-store and omnichannel fulfillment equipment.

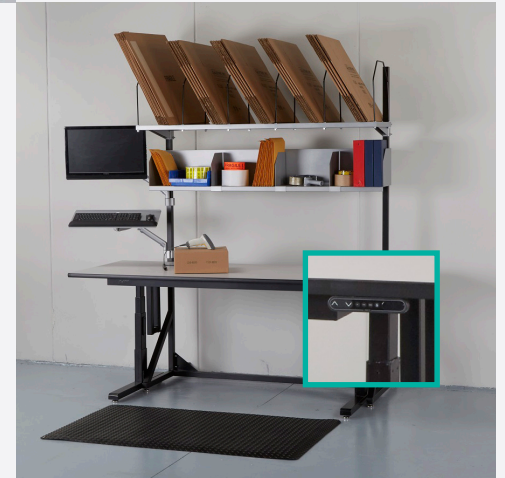

Manifest Operations >

Monitor shipping schedules, prepare manifests, and safely store paperwork for convenient access. Set your workers up for success with well-organized and thoughtfully designed manifest stations.

Adjust on Demand >

Adjust on demand with Dehnco Lift Tables. Durable, ergonomic, and efficient, our lift tables make it possible to accommodate a variety of tasks and storage needs at one single station.

WORKSTATION INTEGRATION SYSTEM EVALUATION

Improving your warehouse requires an expert understanding of how all the components work together and how they can work better. And at Dehnco, that's our specialty. We understand there's no one-size-fits-all when it comes to workstation equipment, and our team will work with you to determine exactly what you need, through our complimentary Workstation Integration System Evaluation (WISE). During the WISE process, our team will identify equipment and accessories to optimize workflow, increase efficiencies, and boost productivity based on your environment, goals, and growth opportunities. When your workers, automated systems, inventory, and equipment solutions all move in sync, they work better and more efficiently.

1

Evaluating Flow

Defined as the movement of materials/products into and out of the work area.

- Define what products and materials are transported in and out.
- How are materials moved in and out of an area.
- What equipment is required to move material.

2

Identifying the Process

Detailing the Step-by-Step Sequence of tasks required to complete the specific work being done in the area.

- Identify each step required to complete the task being done in the area.
- Document the movement and handling of the product and supplies.

3

Integrating the Supplies and Equipment Required to Complete a Task into the work area

List the supplies required to complete the task.

- Identify the equipment required to complete the task
- Formulate a work pattern which is ergonomically efficient.

4

Integrate the Work Area Design with the Process to Maximize the Efficiency of the Operation.

- Maximize Ergonomics
- Reduce Handling
- Maximize Floor Space
- Reduce Environmental Impact
- Reduce Cost
- Save Time
- Improve Efficiency
- Improve Productivity

OUR SOLUTION SUITE

We offer a variety of ergonomic, sustainable solutions for optimizing workflow and boosting productivity. For additional offerings and information, visit our website at www.dehnco.com.

Workstations

Dehnco Modular Industrial Worktables Components can be added to or deleted from the worktables to make them more ergonomically correct for your specific application requirements.

Technology (IT) Accessories

Dehnco provides innovative products and solutions for handling your technology equipment in a manner that optimizes efficiency and ergonomics according to the device being used, who is using the device, how often they interact with it, and where it is located.

Carts & Shelving

Dehnco provides a diversity of highly durable cart and shelving solutions that organize product flow, maximize storage, and increase efficiency and productivity.

Supply Storage

Dehnco offers various fully customizable storage systems to keep inventory and supplies secure and organized.

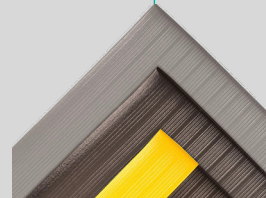

Lift Table Solutions

Dehnco Lift Tables are adjusted to each application based upon the supplies and equipment that need to adjust with the table, the specific flows, processes, the safety of the worker, and the efficiency and productivity of the work required.

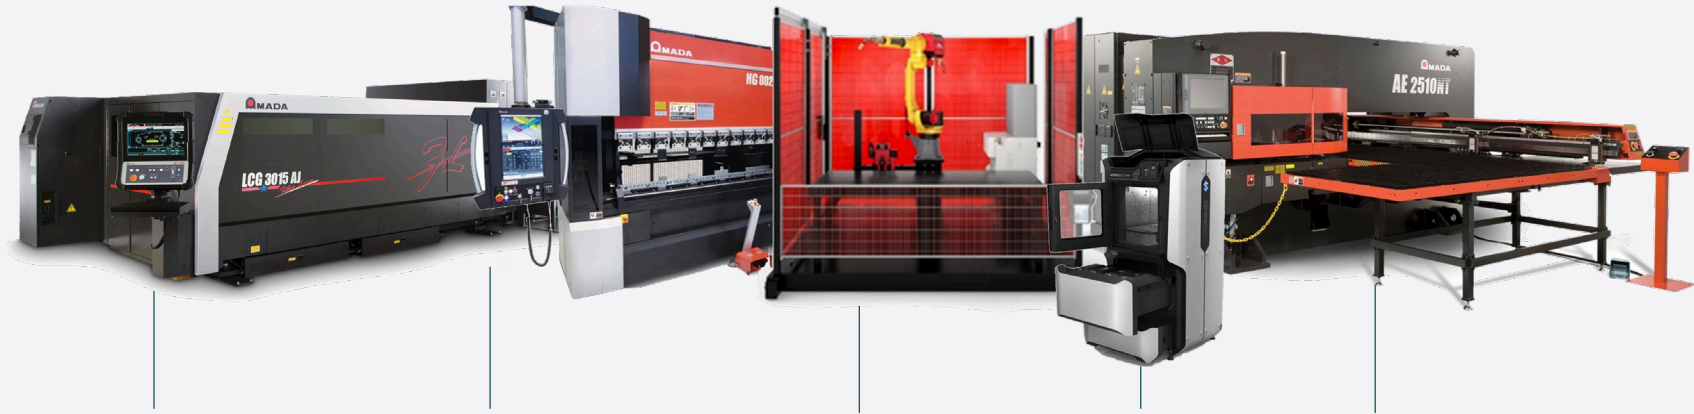

Accessories

Dehnco offers a variety of workstation accessories designed to maximize storage, improve efficiency, and boost productivity.

OUR MANUFACTURING CAPABILITIES

We are able to offer custom-manufactured solutions and OEM services to meet our clients' specific needs. Our OEM experience encompasses a variety of projects including: IT solutions, support structures for put-to-light and put/pick walls, storage units, and specialized automation infrastructure. Our design and engineering teams are in-house and on-call to handle quotes, turn around improvements to existing plans, or create original designs and made-to-measure modifications. If you need it, we can build it.

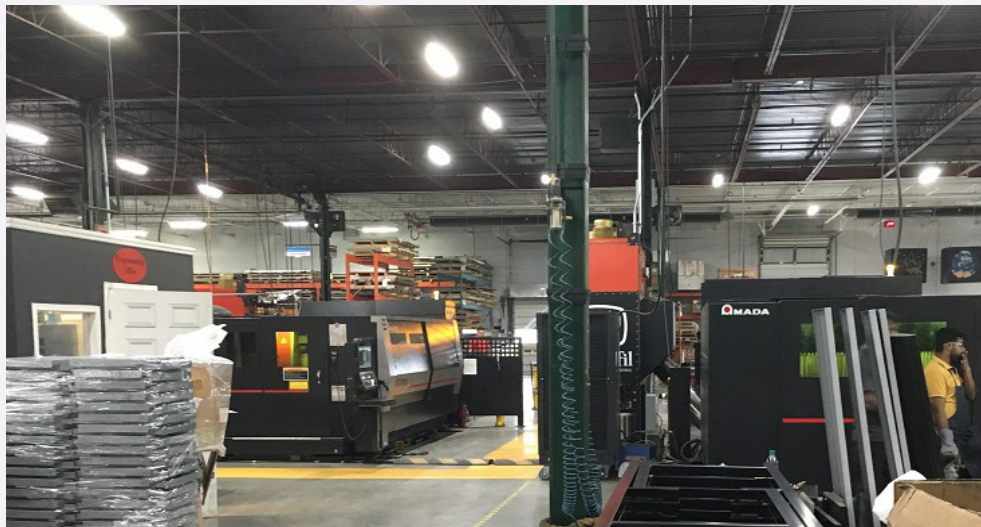

LCG AJ Series Fiber Laser

Amada Press Brakes

Fab-Pak FT-SS (Single Zone)

Stratasys F170 3-D Printer

AE NT Series — Servo Drive Turret Punch Press

Green Initiatives—At Dehnco, we believe that what's good for the environment is also good for business. Our manufacturing facilities are GREENGUARD certified and we are committed to sustainability at every point in our operation.

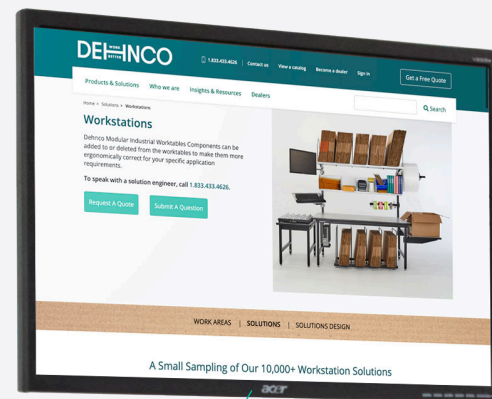

CUSTOMIZED WAREHOUSING SOLUTIONS

The pack-and-ship industry has seen incredible growth and sweeping transformation over the last 20 years. Across the world, order fulfillment timelines are shrinking, and workloads are increasing—forcing companies to put out more, only faster.

Efficiency has never been more critical. And at Dehnco that happens to be our expertise.

For over 40 years, we've been manufacturing state-of-the-art, sustainable equipment solutions for business of all sizes and kinds. All of our solutions are durable, modular, and designed to grow and adapt as your needs change--giving you and your business the flexibility to meet whatever challenge comes your way.

We understand that selecting an equipment provider is an investment in your time, trust, and resources. And that's why we put quality at the center of everything we do. We're proud to offer the in-house design, engineering, manufacturing, and fulfillment expertise to meet your needs in a timely and cost-effective manner—for better prices than you might expect. From the initial consultation to the final delivery, we'll work with you every step of the way to ensure a seamless and successful partnership.

Our Services:

- Custom Equipment Manufacturing
- Quick-to-Market Equipment Solutions
- Complimentary Consulting Services
- In-House Design and Engineering Support
- All Backed by a Lifetime Guarantee

THE DEHNCO DIFFERENCE

As a service to our clients, partners, and dealers, we offer a variety of complimentary planning tools and resources.

Our online interactive Solutions Concepts Library showcases various styles, sizes, and configurations of our equipment offerings. Our catalogue is supported by over 10,000 unique configurations, and users can download complimentary wireframe design sketches and product codes for quick reference.

As an added-value service to our dealers, we offer an online portal for creating and saving custom spec sheets, design layouts, and corporate branded materials. Easily streamline your communications and conveniently access your plans all in one place.
